

This is the location where the skier came to a stop after being caught and carried by a small avalanche in the Bridger Range.

From Obs: "While skiing the playground, a northeast aspect off the Bridgers, my friends and I released a wind slab. The slab released on a rollover and was approximately 20 ft wide and 6-12" deep at the top. The slide carried my friend about 150 ft." Photo: Anonymous

**Advisory Region** 

Bridger Range Longitude -110.93W Latitude 45.84N

**Avalanche Details:** <u>Human-triggered Avalanche, Playground</u> **Forecast link:** <u>GNFAC Avalanche Forecast for Tue Jan 25, 2022</u>
