

Small natural wind slab near Cooke City

COOKE CITY

Cooke City

2/10/2023

Code

N-R1-D2

Elevation

10000

Aspect

SW

Latitude

45.02020

Longitude

-109.93800

Notes

2/10/23: Our group did a big loop - Daisy- wolverine- goose - sheep -lulu. Saw minimal wind transport except on high points (see photo). After looking all day saw an R1D2 [slide](#) (see 2nd photo) on a ENE slope above 10,000' south of Lulu pass, unknown [trigger](#), though the whole area around the [slide](#) had [cornice](#) growth. We observed a lot of tracks highmarking into windloaded alpine slopes but saw no rider triggered avalanches.
