

Shooting cracks in Middle Basin

Middle Basin

Northern Madison

12/15/2024

Code

Latitude

45.33740

Longitude

-111.38100

Notes

When skiing into middle basin, I stopped at the top of a convex roller and had cracks shooting out 50 feet in either direction from what seemed to be a soft [slab](#) in the new snow that slid about a foot or so. This was the most major sign of instability from the day. Lots of shooting cracks when skiing and skinning in the new snow.
