Mt. Ellis update

Date Fri, 01/17/2025 - 04:05 Activity Skiing

Additional information for my mt ellis post, 1/17/2025. My description of the pit snow profile left out the bottom 15-20 cms which was the ever present sw montana faceted snow. It did show signs of healing.

Region Northern Gallatin Location (from list) Mt Ellis Observer Name Dave Combs
