

Wet Loose Avalanches Cooke City

Date

Sun, 04/06/2025 - 16:10

Activity

Skiing

While touring south of town today, we observed two D1 wet loose avalanches on an east [aspect](#) at 10000'. Both occurred at 11am and were triggered by a small [cornice](#) fall due to rapid warming.

Region

Cooke City

Location (from list)

Hayden Creek

Observer Name

Nina Hance
